

A/B Diversity Array

Product Configuration Series:
Using Multiple Power Systems

Fault-Tolerant Architecture

Single Power System

Connections

- Mains AC Entry Panel
 - Individual circuits to power system or power modules
 - Majortel design includes: AC input cords from house power source to rectifiers (120/240)
- Majortel Power System #1
 - 48V dc output connections to Load Input: X^A and Y^A
 - 48V dc output connections to Load Input: X^B and Y^B
- Configuration is limited by current draw of loads or the number of connections.
